

Tissues

From Tissue Morphology to Accurate Interpretation

This training focuses on the interpretation of tissue-related antibodies used in the diagnosis of autoimmune diseases affecting organs such as the liver, kidney, and stomach. By combining insights into tissue morphology with pattern recognition, participants gain a better understanding of how to interpret results accurately and consistently in daily laboratory practice.

What to Expect

- ✓ Introduction to liver, kidney, and stomach morphology
- ✓ Overview of key antibodies: AMA, ASMA, APCA, LKM
- ✓ Recognition of additional patterns
(e.g. ribosomes, reticulín, LCA, LMA)
- ✓ Practical tips for correct sample handling
- ✓ Guided interpretation of images and case discussions

Who Should Attend

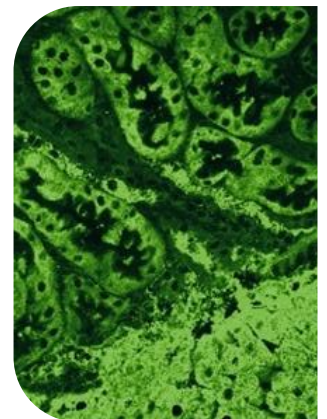

- ✓ Laboratory technicians or Clinicians
- ✓ Professionals interested in tissue antibody testing
- ✓ Those looking to improve interpretation skills

Training Format

- ✓ Onsite in Antwerp (EurobioBMD) or online
- ✓ Delivered in Dutch or French

Certification & Materials

- ✓ Personalized certificate after completion
- ✓ Printed training materials available on request
