

Streck Cell Preservative[®] CE

Streck Cell Preservative is an easy-to-use liquid preservative that maintains cellular antigen expression, including cluster of differentiation (CD) markers of biological samples for up to 7 days prior to analysis by flow cytometry. It preserves peripheral and cord blood samples, surgical tissue samples, bone marrow and fine needle aspirates.

Features

- + Up to 7-day sample stability when analyzed by flow cytometry
- + Preserves peripheral and cord blood samples, surgical tissue samples, bone marrow and fine needle aspirates
- + Available in 1 mL and 10 mL vials

Benefits

- + Minimizes the adverse effects of time, storage and transport conditions on sample integrity
- + Reduces the need for immediate sample processing and analysis
- + Allows for the batching of samples, optimizing laboratory workflow
- + Minimizes patient recalls, redraws and associated costs
- + Potentially decreases the need for weekend and overtime work
